PROFESSIONAL SUMMARY

Computer Science undergraduate (CGPA 8.1) skilled in Java, Python, and full-stack web development, with hands-on experience building ML-powered and data-driven applications. Proven ability to turn ideas into working products — from fraud detection systems to real-time computer vision tools. Eager to bring strong problem-solving skills and a fast-learning mindset to a Software Engineering role.

TECHNICAL SKILLS

Programming Languages: Java (J2SE), Python, JavaScript, C, SQL

Web Development: HTML5, CSS3, JavaScript, RESTful APIs, Responsive Web Design

Machine Learning & Data: Machine Learning, Computer Vision, OpenCV, NumPy, Random Forest, XGBoost, K-Nearest Neighbours (KNN)

Data & BI Tools: SQL / DBMS, Power BI, DAX

Developer Tools: Git, GitHub, VS Code, Eclipse

Core CS Concepts: Object-Oriented Programming, Data Structures & Algorithms, Agile Methodologies

Soft Skills: Problem-Solving, Technical Communication, Team Collaboration, Fast Learner, Adaptability, Time Management

INTERNSHIP EXPERIENCE

Power BI Intern — Cognifyz IT Solutions Pvt. Ltd.

May 2026 – Jun 2026

- Created interactive dashboards and reports in Power BI, applying DAX to build calculated metrics and KPIs for business analysis.
- Analyzed and transformed datasets, visualizing insights through multiple chart types to support data-driven decision-making.

PROJECTS

AI Spend Optimizer — Personal Project | github.com/Padala-tejaswini/-ai-spend-optimizer

2026

- Built a tool to identify the most cost-effective AI model for a given use case, tracking API token usage and GPU/CPU resource consumption with automatic cost-optimized task routing.

FraudBusters – Ecommerce Fraud Detection System — Personal Project | github.com/P-Tejaswini/fraudbusters

2026

- Built a fraud detection system using Random Forest and XGBoost to flag fraudulent transactions and suspicious patterns, trained on the Kaggle fraud detection dataset.

No-Parking Vehicle Detection System — AI/Computer Vision Developer

May – Aug 2024

- Built an ML pipeline with Python, OpenCV, and NumPy achieving 92% detection accuracy at 30+ FPS in real time, integrated with backend for automated violation reporting.

Digital Complaint System with Resolution Tracking — Full-Stack Developer

Jan – Feb 2025

- Built a full-stack web app with RESTful APIs for citizens to submit and track complaints across pending, in-progress, and resolved states.

Air Canvas – Gesture-Based Drawing Application — Computer Vision & HCI Developer

Mar 2025

- Built a touchless drawing app using OpenCV hand-tracking and gesture recognition, achieving sub-100ms latency for smooth interaction.

Age Calculator Web Application — Front-End Developer

Jan – Feb 2025

- Built a responsive age-calculation web app in HTML5, CSS3, and JavaScript with accurate edge-case and timezone handling.

EDUCATION

Bachelor of Technology, Computer Science Engineering — Sree Chaithanya College of Engineering

2024 – 2027 | CGPA: 8.1

Diploma, Computer Science Engineering — Jyothishmathi Institute of Technology and Science

2021 – 2024 | CGPA: 9.7

Secondary School Certificate (SSC) — Kakatiya High School

2021 | CGPA: 10/10

CERTIFICATIONS

- Python + AI Skills to Ace 30 LPA+ Data Roles at Microsoft** — Coding Ninjas
- Fundamentals of Artificial Intelligence (Guided Path)** — Code360, Dec 2025
- Basics of Java – Part I (Guided Path)** — Code360, Jan 2026
- KNN Algorithm in Python and R | GenAI for Everyone** — Analytics Vidhya, Dec 2025
- Unlocking AI for Everyone (Beginner)** — Skill India (NCVT)/Microsoft, Mar 2026
- Critical Thinking in the AI Era** — HP LIFE/HP Foundation, Jan 2026
- Cyber Awareness & Digital Hygiene** — CyberWalNet, Mar 2026

ACHIEVEMENTS & EXTRACURRICULARS

- Participated in Internal Hackathon, Sree Chaithanya College of Engineering | State 2nd Rank, English Typewriting.
